AUSTRIAN DESIGN DUO INTRODUCE A NEW KIND OF LUXURY TO UK WITH 21 PIECE FURNITURE COLLECTION

Inspired by the stripped back design of alpine chalets, Peter Daniel and Nicole Horn, the two Viennese designers behind stuben21, set about creating a bespoke furniture collection that celebrates clean forms free from ornamentation. The result is an eye-catching collection that is functional, comfortable and stylish.

In this collection function takes centre stage: from the stainless steel footrests to the subtly positioned drawers, the pieces are made to be used and serve the comfort of the user. The Chess Table is a prime example of the collection's intelligent design: fuss-free, it works equally well as a beautiful coffee table.

The dining table is the focus of the collection: a central meeting place and the heart of any home. It is made for everyday life, but is by no means commonplace; this is bespoke furniture, made with honest and sustainable materials.
